

# Capture OnTheGo

OL™ Software

## Carry your forms... **NOT the paper**

Corporate documents have never been so light and easy to take around.

## Capture OnTheGo the «must have» solution for Field Service Management

*All documents that you need when on the field can be easily and immediately accessed, filled and signed. They are then sent back to systems via the mobile application.*

*Attachments such as photos, sounds, or anything that is relevant to the file can also easily be added.*

### Offline mode

#### What happens when there's no Internet connection?

Documents and forms can be downloaded to the device even without connection. The application automatically queues documents and forms that need to be sent so that whenever the connection comes back, they are sent right away.

### Secure document sharing

The documents and forms available for download are always stored on the servers, and can be accessed via the repository. Once downloaded, they are stored in the user's library.

Also, users and user groups can be easily managed so that they only have access to what they are entitled to, and what is relevant for them to see.

With Capture OnTheGo, documents can also be sorted and searched by client's name or document category.

# Features

## Mobile application

- Repository
- Library
- Annotations possible on PDFs
- HTML Form Editing

## Web Admin Panel

- Home screen to manage repository, users, user groups, documents and other parameters
- Easy management of users, users groups and documents
- White label to enable application branding

## PlanetPress automation feature

## Files sending with multi-media content

## Online and offline modes

## Icons to visualise documents' status

## Multi-media content

When sending documents back to the systems, it's now possible to attach relevant complementary information like pictures, sounds, geo-location. And that information is then filed with the document or form.

It is also possible to add a signature on a form, which can then trigger a subsequent process such as invoicing.

## Preserved bandwidth

Because only input data needs to be transferred - and not the whole form - a lot of bandwidth can be freed, making data transfer much faster.

## AN EXTENSIVE MAINTENANCE PLAN

## OL™ Care

- Online training
- Updates & upgrades
- Technical support

## Typical verticals

- ✓ Retail
- ✓ Field Services
- ✓ Distribution
- ✓ Any business
